# ISOLAB Facility

ISOLAB testing facility has been developed during over 20 years of experience in **antiseismic engineering, manufacturing and testing of bearing and antiseismic devices**

Thanks to agreements with several Universities ISOLAB can perform test as Official Lab for static and dynamic tests according to international standards

Accredited with

**UNI EN ISO 9001:2015**  
Certification of Quality system

Calibration of test equipments according to

**STANDARD ISO 7500 (Class 1 or Class 0.5)**  
**AMERICAN STANDARD ASTM E4-16**

**LABORATORY**

For  
**Static & Dynamic testing**

**Devices tested**  
in accordance to the main relevant  
**European and worldwide Standards**

**R&D PROJECTS**

**ISOLAB & Design Division are working together**
